

# CYCLOPS MARINE

## J/70 Tuning Guide

### Windspeed

Forestay (kg)*	3-6kts	7-10kts	11-14kts**	15-18kts***	19kts+
Static/Dock	90	100	120	150	170
Dynamic/sailing	150-250	250-350	350-500	500-650	650-750

\*\* start application of backstay to depower, this will contribute to the forestay load

\*\*\* Application of vang at this windspeed will reduce forestay load, this needs to be counteracted with backstay.
